## **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listing, of claims in the application:

Listing of Claims:

1-12 (Cancelled)

13. (Previously Presented) A system, comprising:

a first electronically operated device, including a telephone function that controls receiving a telephone call,

said first electronically operated device sensing a first control, and responsive to sensing said first control, creating a synthesized voice that requests information;

said first electronically operated device receiving a voice to be recognized responsive to said creating said synthesized voice ;

said first electronically operated device including a connection to a network that extends between said first electronically operated device and a second device,

wherein said first -electronically operated device operates to obtain recognized voice information from said voice to be recognized,

said first electronically operated device storing plural different contact information for plural different contacts;

**Appl. No.** : **09/683,600**  
**Filed** : **January 24, 2002**

wherein said first electronically operated device compares said recognized voice information against said stored contact information, and recognizes said recognized voice information only as being one of said stored contact information, and controls automatically placing a call based on the stored contact information obtained from the recognized voice information.

14. (Previously Presented) A system as in claim 13, wherein said first electronically operated device is included within a portable telephone.

15. (Previously Presented) A system as in claim 13, wherein said first electronically operated device is included within a personal digital assistant.

16. (Cancelled)

17. (Previously presented) A system as in claim 13, wherein text indicative of said recognized voice information is displayed on said first electronically operated device and includes text indicative of said one stored contact based on said voice to be recognized.

18. (Previously presented) A system as in claim 13, wherein said network connection is a Bluetooth connection.
